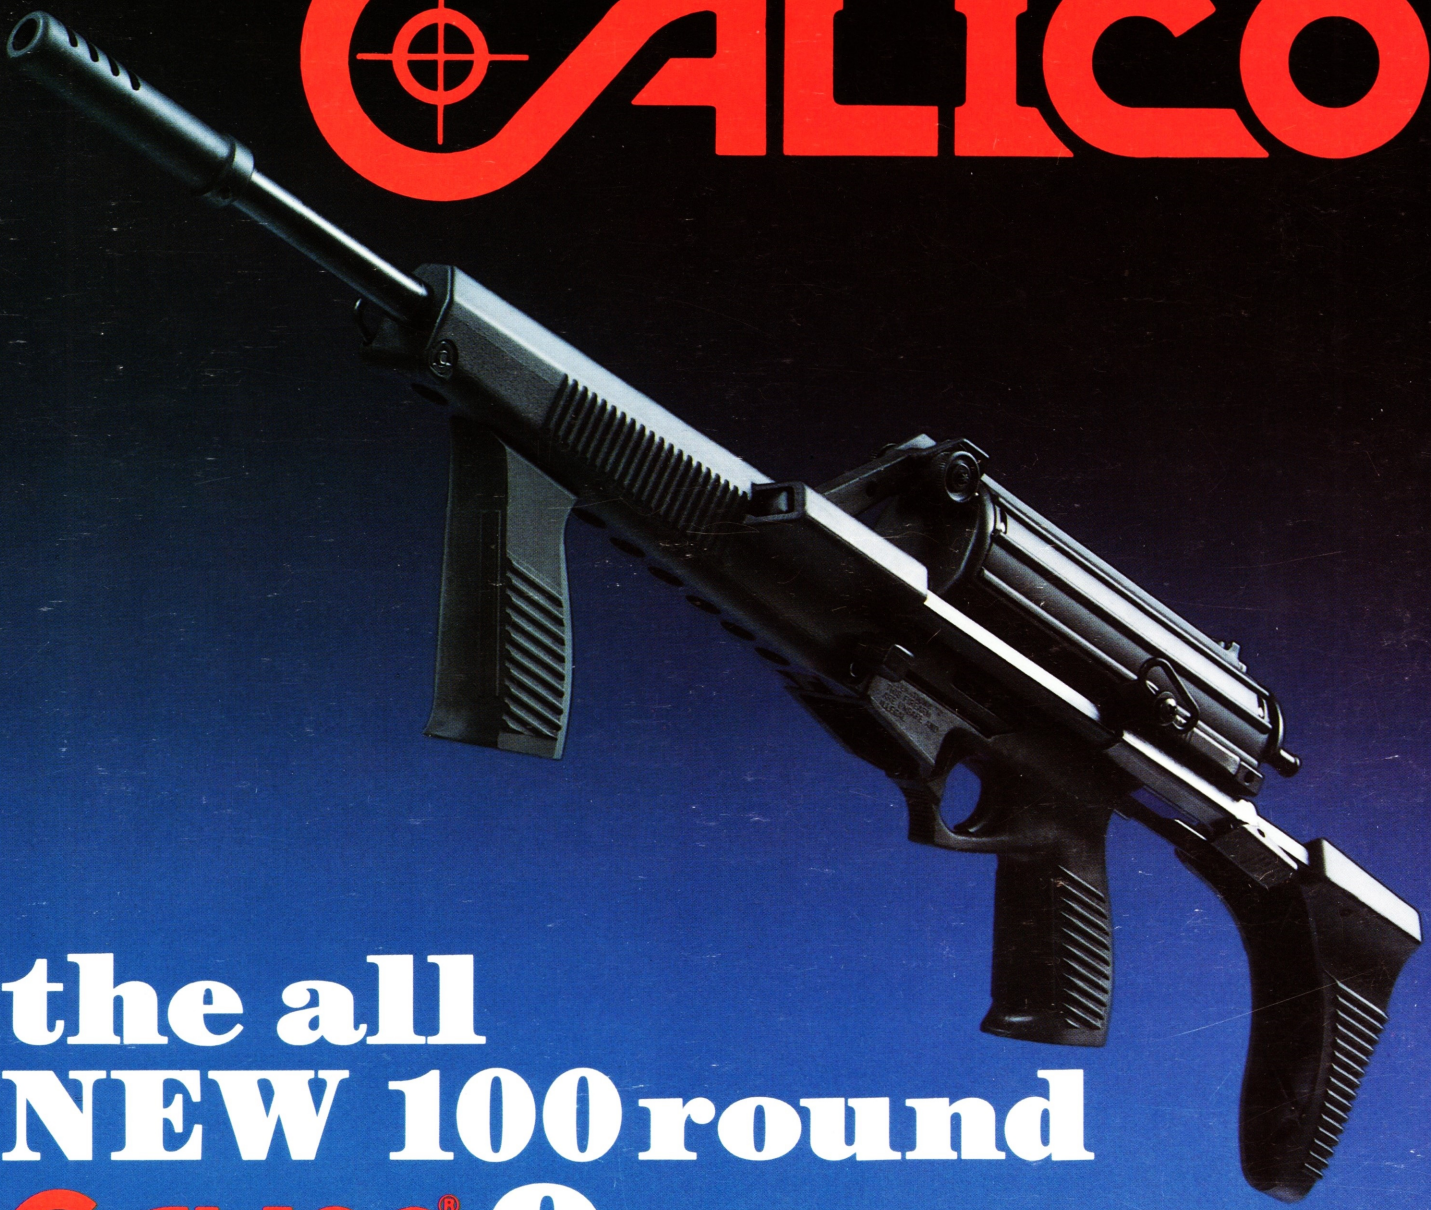
CALICO



the all NEW 100 round CALICO® 9mm

Offers unique advantages in capacity, weight and superior handling characteristics not found in any other weapon. These advantages are part of the Helical Feed system, the greatest improvement in fire arm design in decades. You have the option of using the 50 or 100 round magazine. Even with its 100 round magazine it's lighter than an UZI or H&K and retails for substantially less. The Helical Feed system, which allows a minimum profile and supply logistics advantages, can be loaded and stored without spring fatigue. The combination of 50 or 100 round capacity and superior hit probability make the M•950 pistol M•900 carbine and M•951 Tactical Carbine the most advanced small arms in the world.

CALICO 9mm 50 round Pistol and Carbines

The *all new* Calico M•950 Pistol, M•900 Carbine and M•951 Tactical Carbine combine several unique features to create superior handling not found in any other weapon. They incorporate the Helical Feed system with the option of using a 50 or 100 round magazine. Even with the 100 round capacity they are lighter than an UZ1 or H&K and retail for substantially less. The Helical Feed magazine can be loaded and stored without spring fatigue, and with the Calico speed loader, the 50 round magazine can be loaded from an open box in less than 15 seconds, 30 seconds for 100 rounds. Both pistol and carbines have virtually no muzzle climb, even while rapid firing, and eject spent cases straight down, in front of the trigger guard for close quarter operation. A fully ambidextrous safety, a static cocking handle with no external moving parts offer superior handling of the M•950 pistol, M•900 carbine, and M•951 Tactical Carbine. All three field strip in a few seconds without tools and feature an easily adjusted front sight for windage and elevation. The M•950 pistol when fully loaded is comparable in weight to a big bore pistol, except the M•950 pistol has 50 rounds of ammunition. The M•900 and M•951 Tactical Carbine feature a comfortable sliding steel buttstock that locks solidly into position for added accuracy. The Calico M•950 pistol, M•900 carbine and M•951 Tactical Carbine are comfortable, durable, accurate and have more firepower than you ever dreamed possible.

The bolt is a delayed blowback type similar to H&K's except ours was designed specifically for 9mm ammunition and is significantly smaller and lighter. Manufactured from high strength heat treated 440C stainless steel that easily withstands shock, wear and corrosive fouling. The bolt, striker, springs and buffer drop out of the receiver as a single unit with no loose parts.

M•950 PISTOL SPECIFICATIONS

CALIBRE	9mm NATO/PARA
CAPACITY	50 or OPTIONAL 100 RD. HELICAL FEED MAGS.
ACTION	RETARDED BLOWBACK - CETME TYPE
RATE	SEMI-AUTO
MUZZLE VELOCITY	APPROX. 1290 FTSEC W/6" BARREL
WEIGHT PISTOL	
EMPTY	2.25 lb.
LOADED W/50 RD MAG	4.0 lb.
LOADED W/100 RD MAG	5.8 lb.
LENGTH	
W/50 RD MAG	14 in.
W/100 RD MAG	19 in.
BARREL	6 IN. HEAT TREATED CHROME MOLY
RIFLING	6 LANDS AND GROOVES, 1 TWIST IN 12 IN.
RECEIVER	PRIME-CAST A - 356 ALUMINUM T-6 TEMPER
FURNITURE	GLASS-FILLED MINLON, IMPACT RES.
SIGHTS	FIXED NOTCH REAR, ADJ. POST FRONT (WINDAGE & ELEVATION)
SAFETY	ROTATING SEAR BLOCK
RANGE, EFFECTIVE	300 YDS. MAX

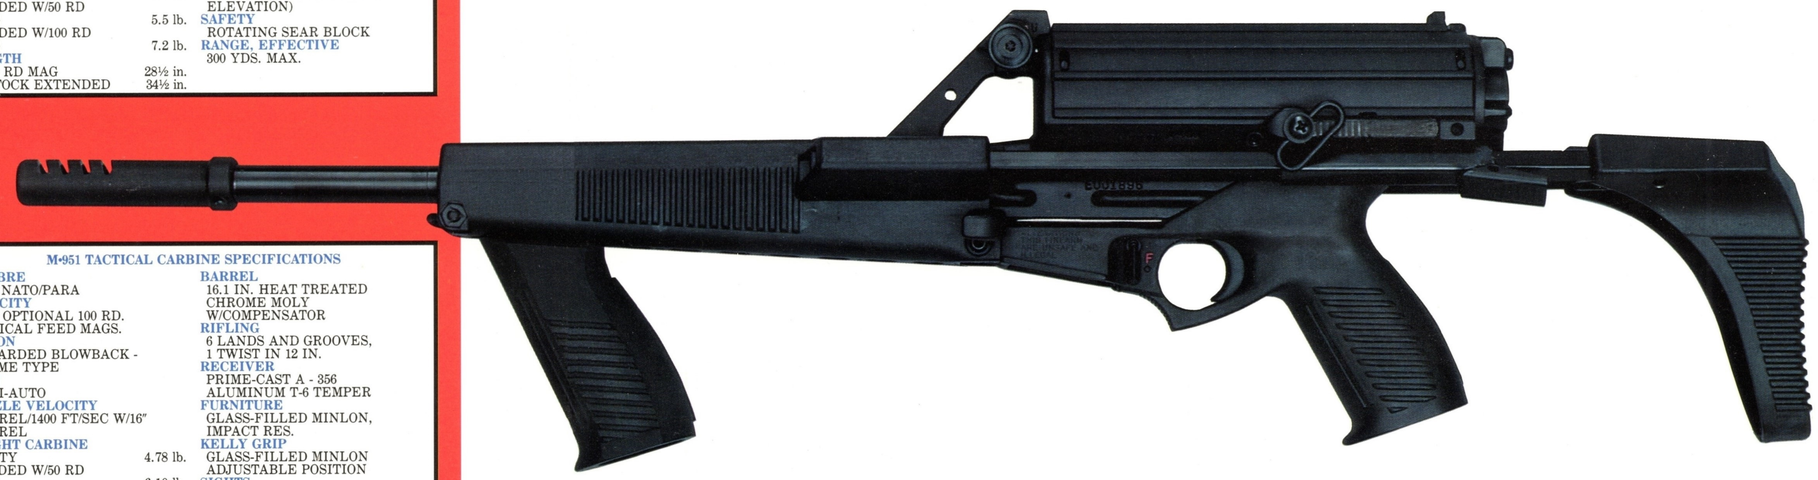
M•950 PISTOL

M•900 CARBINE



M•951 TACTICAL CARBINE

M•950 PISTOL, M•900 & M•951 CARBINE ACCESSORIES

The patented M•900, M•950 and M•951 one hundred round magazine is the new high-water mark in firearm development. The one hundred 9mm cartridges are stacked in two helical layers around the inside of a magazine that takes up less space than the empty ammo boxes. The cartridges roll on each other like ball bearings to minimize friction. The drive spring is less than half an inch in diameter, so there's no wasted space.

The 9mm speed loader fits both 50 and 100 round magazines for the Calico M•900, M•950 and M•951. It takes just 15 seconds to fully load from an open ammo box to magazine, 30 seconds for the 100 round magazine. Just lay the rounds on the clear plastic tray, remove the styrofoam or plastic carrier, snap the arms closed, insert the magazine and crank'em in.

ACCESSORIES

- **#905** 9mm Loader
- **#915** 50 Round Magazine
- **#940** Small Compensator
- **#935** Large Compensator
- **#910** 100 Round Magazine
- **#925** Scope Mount
